

LabKey Server

EDITIONS OVERVIEW

LabKey Server helps biomedical research teams unlock the value of hard-earned data, enable collaborative science, and open doors to new modes of discovery. The powerful platform helps integrate, analyze and securely share complex research information while adapting to evolving needs. LabKey offers multiple Editions of LabKey Server and a suite of Add-Ons to best meet different levels of need for support and functionality.

Community Edition

The Community Edition of LabKey Server is free to download and use forever; however, it is not formally supported, so it is best suited for technical enthusiasts and evaluators in non-mission-critical environments. LabKey provides community forums and documentation to help users support each other.

Premium Editions & Add-Ons

The Professional, Professional Plus and Enterprise Editions of LabKey Server are paid subscriptions that provide additional functionality to help teams optimize workflows, securely manage complex projects and explore multi-dimensional data. These premium Editions also include LabKey's professional support services and allow our experts to engage with your team as long-term partners committed to the success of your informatics solutions. 2016 subscription prices start at \$37K/year plus tax.

PROFESSIONAL

The Professional Edition is designed for small- or medium-sized teams that need to optimize workflows, enable collaboration and support basic connection of lab, specimen and clinical data. This Edition is for researchers who want to extend their use of LabKey Server, but do not need deep integration with other systems or major customization. As part of our support services for this Edition, administrators and users receive training and ongoing coaching and advice to help them become experts at managing scientific data with LabKey Server.

ENTERPRISE

The Enterprise Edition is designed for teams that need to support clinical data integration at large scale, potentially including regulatory compliance.

Philosophy

Researchers and clinicians dedicated to the common good deserve quality tools to help them focus on discovery and care rather than battling information bottlenecks. LabKey's product approach reflects our team's deep commitment to providing life science and healthcare groups with open, professional-grade, cost-effective solutions.

We offer a balance of free and premium products to help us ensure a strong, open, sustainable platform for all. The core components of LabKey Server are open source, enabling transparency, extension and sharing. LabKey also invests in premium features to benefit the user base and makes these available by subscription.

Should you decide to cancel your subscription after the first year, you still keep the software, including the source code for premium functionality. In the future, we hope you re-subscribe to regain ongoing access to professional support and software upgrades, particularly desirable security updates.

LabKey Server Edition Comparison

| | Community | Professional | Professional + |
|---|-----------|----------------------|----------------|
| Software | | | |
| General | | | |
| Access to associated source code and installers | X | X | X |
| Extended look-and-feel customization | | X | X |
| Security and Authentication | | | |
| Two-factor authentication, CAS SSO, OAuth | | X | X |
| Advanced SQL query logging | | | X |
| Direct Integration | | | |
| REDCap, FreezerPro and SAS/SHARE | | Available as Add-Ons | X |
| SQL Server Synonyms | | | X |
| Consulting | | | |
| Development of project roadmap including initial design planning | | X | X |
| Ongoing system architecture and design advice from technical leads | | | X |
| Training | | | |
| Online documentation, tutorials, videos and community forum | X | X | X |
| Custom-tailored user/admin training | | 1 session/yr | 2 session/yr |
| Custom-tailored developer training | | | 1 session/yr |
| Early preview of new features and ability to provide input on product roadmap | | X | X |
| Support | | | |
| Priority fixes for customer-specific issues | | X | X |
| Private support portal and direct access to LabKey support with guaranteed response time | | X | X |
| Ongoing project management support | | X | X |
| Customized hardware/software environment recommendations | | X | X |
| Installation, maintenance, monitoring, reporting and upgrade assistance | | X | X |
| Ongoing data management and security recommendations | | X | X |
| Proactive server and query performance monitoring and optimization | | X | X |
| Support for basic scripting in R and SQL | | X | X |
| Support for multi-organization portals | | | X |
| Professional-grade developer support including server to server integrations, client APIs, ETLs, assay transform scripts, remote pipeline processing servers and clusters, custom LabKey-based pipelines, and module development assistance | | | X |
